

# FORENSIC AUDIT

Last weekend, I had the privilege and honor to travel to Phoenix and observe the Maricopa County forensic Audit. To say it was amazing is a gross understatement! The Republican Senate led by Karen Fann is technically in charge of the audit and they have contracted Florida based "Cyber Ninjas" to actually conduct it. Despite all the negative press and endless lies that are printed everyday by the mainstream media, this is the most intense, complete and thorough forensic audit that has ever been conducted on the planet. The procedures that have been implemented assure that the "chain of custody" of the ballot is NEVER broken, and that every single ballot will be examined intensely under a microscope to determine its authenticity.

Armed guards watch over the entire facility 24 hours a day. There are 9 cameras watching over the floor where the counting was taking place and 90 micro cameras watch individuals every move. Only red or green pens are allowed on the floor. Tearing paper is prohibited. Cell phones, tablets and smart watches are also prohibited. Any type of marker is restricted including Lipstick and chapstick. You sign in and sign out with procedures that mimic those used around nuclear weapons.

With the exception of the Police, every one of the workers is a volunteer and their political affiliation is never known. In fact, any talk of politics is strictly prohibited! The only requirements are being a resident of Maricopa County and voting in the last election. It doesn't matter which way a worker would lean politically because the procedures are so rigid that it is impossible for anyone to cheat anyway!

The Democrats have tried to shut down this audit at every turn to include attempting to delete files. They are currently focused on WHO is paying for the audit, as if that would be a reason to shut it down. It is being funded primarily by private sources. Their efforts to stop this would fill several pages. Why is that? Wouldn't it make sense to prove beyond a shadow of a doubt that Biden was the clear cut winner? Wouldn't that shut up those pesky Republicans once and for all? Or is it possible that they actually DO have something to hide?

I believe the results of this audit will be like "The shot heard round the world". This audit has been conducted with so much precision, accuracy, integrity and visibility, that no court in the land will be able to dispute it. They have designed it to survive the strictest court scrutiny. I believe the results will shake the nation to the very core and probably be the catalyst for "forensic audits" all across the country. It could trigger things much bigger. Regardless of how upsetting it is, our citizens need to know the truth. This audit will determine that once and for all.

Forty-seven percent of Americans believe that the election was fraudulent. This cannot stand. If citizens lose faith in their power to vote, democracy will cease to exist and our country will collapse. This Forensic Audit must continue and Wisconsin residents should expect and demand no less from our Legislators. Write, email, and call your Representatives and demand that we too, conduct a "Forensic Audit" of our election here in Wisconsin. The cost to Wisconsin taxpayers would be negligible, as there are private funds currently willing to finance it. Your Representatives need to hear from you now. Our liberty depends on it! DO IT NOW! Remember, we only get the government that we deserve! There simply is no time to waste to save our great nation and for Wisconsin voters to know that THEIR VOTE COUNTS!
